## ABC Pelé Remote Head

The Pelé Remote-Head is a further development of the successful ABC Standard Remote-Head known for its lightness and user-friendliness. This head was chosen to be used during the 2002 World Football Championship and will be used in all stadiums in Japan and Korea behind the goalkeepers. Some of the main characteristics of the new Pelé Remote-Head:

Pelé on Crane 120

- super light and extremely robust construction
- quick and easy to mount due to rational concept
- pan and tilt are very precise and powerful thanks to programmable digital motors
- precise and reliable joystick, direction of tilt can be varied
- zoom and focus integrated for motorized lenses (Fujinon or Canon)
- zoom speed can be varied at any time from control panel
- control panel includes control monitor
- control of pan and tilt as well as monitor signal run through one single cable
- can be used with standard NP1 batteries (not included)
- flight case included

## The company ...

ABC Products has been active in studying solutions for the moving camera technique for many years becoming an almost unchallenged expert in the field. Many television companies as well as private video and film studios appreciate the solutions that ABC Products is able to provide.

Some of our products:

### Light Cranes

The lightest cranes in the world, in different lengths, from the consumer crane up to the professional crane with remote-head systems.

### Light Dolly with track system

**ABC Spirit Light**, a light system in a protective case.

ABC Products is also able to find solutions for many other filming situations which have one thing in common:

**filming with the moving camera!**
